Library and Information Technology Services

Library and Information Technology Services

Located in Rosary Hall, Library and Information Technology Services offers a wide range of support and training for students, faculty, and staff navigating the College's digital and academic resources.

Library Services

Library staff help students develop research and information literacy skills essential for academic success and lifelong learning. Resources include access to over 70,000 e-journals, newspapers, and magazines, as well as more than 350,000 e-books across all subject areas. Students can access digital and print collections through the Library's online catalog, *Boots OneSearch*, from on or off campus.

Technology Services

Technology Services supports teaching and learning both in person and online. Instructional support includes training for eLearning, ePortfolio, Google Workspace, Microsoft Office, and more. The Information Help Desk assists with access to campus technology. Technical Services maintains the College's networks, servers, devices, and cybersecurity. Internet Communications manages the website, myAlbertus portal, and internal communications. Administrative Computing supports campus-wide systems and applications.
